

RESCUE RANGER
Delivering Hope, One Ride at a Time

Rescue Ranger Citizen Document Unit

The **Rescue Ranger Citizen Document Unit** was designed out of necessity to reach the citizens in remote areas and in some cases very tough terrain. This **Citizen Document Unit** consists of our Rescue Ranger sidecar that is similar to the media or education unit. This **Citizen Document Unit** however has all the necessary equipment to do a number of citizen documentation services that governments may require and that is lacking in these areas as they are so remote. Documents and services that may include Identity

Documents or Cards, Birth Certificates, Population Census and Data Collection to name a few, The **Citizen Document Unit** will also be able to do any function that required citizen to go to their home affairs offices or government offices to get the required help or assistance with documentation that may be required.

The **Citizen Document Unit** has a base model that comes with standard. The equipment that come with the standard base unit is listed below including a two-by-two gazebo that can be branded on all sides as per customer requirements. In Addition to this the customer can let us know what IT and office equipment is required in the unit. The unit will have communication setup to operate live on the government systems it may be linked to. Items such as biometric scanners for both facial and fingerprint recognition would be important items as to correctly get the citizen linked to the government system for the necessary documentation and services.

Items and equipment that would be optional are things like printers, card printers, biometric scanners, communications equipment like modems and satellite links, ups systems and additional stationary off office Supplies

Standard Equipment Supplied

This **Citizen Document Unit** base model has following equipment that will come with the unit as standard.

- Rescue Ranger Jailing AG200 Motorcycle (White)
- 4 Stroke, Electric start, Pushrod, Petrol motor.
- Modified front forks and suspension for sidecar suitability
