

RESCUE RANGER

Delivering Hope, One Ride at a Time

Rescue Ranger First Responder unit

The **Rescue Ranger First Responder unit** has been developed to provide a quick first response to emergencies enabling the response person or paramedic to get to an emergency incident as quickly as possible. The First responder is our solo bike, it is able to lane split lanes when the roads are congested with vehicles and traffic. The unit is equipped with a level one or level two jump bag, it also has a number of medical support items. It has items for traffic control and a variety of tools enabling the responder to clear and make the accident or situation safe for them to and give medical assistance to the patient as quickly as possible. In situation where every second is critical, assisting and stabilising a patient while waiting for more advance ambulance to arrive may be lifesaving.

The first responder comes with a full 100-Watt siren and emergency lighting and is decaled with reflective decals for high visibility especially when dark in the evenings
The First responder Unit is able to carry 2 people and has excellent handling over rough terrain.
Equipment can be added as required and decals can be customised fir required.
