

## RESCUE RANGER

Delivering Hope, One Ride at a Time

### Rescue Ranger Utility Unit

The **Rescue Ranger Refuse Removal Unit** consists of a sidecar with large cage that is mounted on the successful **Rescue Ranger** platform. This unit is to assist communities with refuse remove. The idea is to get the community to put all the refuse and litter into municipal plastic bags for collection and removal. The unit has a rear opening door to assist with emptying the unit and a solid floor to assist with cleaning. The cage will be designed to allow the driver of the unit to safely see past the cage then extend up enabling most amount of storage. The unit is designed for removal of refuse, even in harder to reach communities to avoid refuse from causing environmental issues and diseases cause the refuse that is not disposed of in the correct manner.

The **Rescue Ranger Refuse Removal Unit** will work well in conjunction with our other units in the event of a break out of disease. The water purification unit to clean water for the community, the media education unit to educate the community to in the way to prevent themselves and the community from getting ill. The clinic to test the community and administer required medical assistance and the ambulance to take the patients that are in need of high medical care. While removing what could be the source of the breakout, like incorrect refuse removal that that may cause illness by leaking in the water system.
